- Tracked keyword positions and analyzed SEO performance metrics.

PUBLICATION

Chapter Author

Bhumi Publication – Intelligent Computing and AI Frontiers

2026

- Published a book chapter titled "EEG Emotion Recognition Using Deep Learning."
- Applied deep learning techniques to EEG signal data for human emotion recognition and developed an Emotion Analysis System with interactive visualization of predictions.
- Performed EEG signal processing, emotion classification, and generated AI-driven insights.
- Collaborated with co-author under academic mentorship to successfully complete the research.

LEADERSHIP & EVENT MANAGEMENT

Workshop Coordinator & Team Member

2026

Yugam 2026 – Techno-Cultural Fest

- Coordinated and managed 80+ workshops as part of a large-scale techno-cultural fest, leading end-to-end execution including planning, scheduling, and speaker coordination.
- Managed participant engagement, registrations, and on-ground operations efficiently under high-pressure environments.
- Contributed to logistics, coordination, and communication with participants and speakers as an active team member.
- Demonstrated strong leadership, communication, and multitasking skills throughout the event.

PERSONAL PROJECTS

Accident-Prone Zones Analysis (Mini Project)

- Analyzed accident data using Python and Excel and Data Visualization to identify high-risk zones and improve road safety.

Spotify Data Analysis (Power BI Project)

- Analyzed Spotify data (2014–2022) to uncover music trends and created interactive dashboards.

She Secure – Cyber Threat Monitoring System (Hackathon)

- Developed an NLP-based system to detect cyber threats in messages and enhance online safety; reached Hackathon Finals.

Digital Marketing for a Gold Retail Shop

- Designed a digital marketing strategy to enhance Google Business profile engagement and boost online visibility for retail growth.
